Challenge: Scavenger Hunt *Mini*[1]

Objective

The goal of this challenge is to wade through the ridiculously threaded sequence of junk that I've put together and (hopefully) reach the end of the rabbit hole...the center of the onion...the light at the end of the tunnel...the undoubtedly satisfying conclusion! Hopefully, this challenge will help prepare you for what's coming.

It begins with a piece of paper...

You will need Internet connectivity, your know-how, and many of the programs that you have written in this class.

GOOD LUCK!

---

[1]   Note that this is a *small* version of a similar challenge that you will undoubtedly encounter during Cyber Storm!
